

## **REFERENCE FIELDS FORMED AT THE DOSIMETRIC BETA-RADIATION FACILITY**

*Wednesday, 13 July 2022 11:10 (20 minutes)*

To reproduce absorbed dose units, directional and individual dose equivalents of beta radiation in tissue-equivalent matter, and to transfer the obtained units to working standards and dosimeters of beta radiation, beta radiation dosimetry units are used, which form the reference fields from radionuclide beta radiation sources.

### **The speaker is a student or young scientist**

No

### **Section**

1. Nuclear technology and methods in medicine, radioecology

**Primary author:** ТИТКОВ, Руслан

**Presenter:** ТИТКОВ, Руслан

**Session Classification:** Poster session
