

## **iDREAM detector today**

*Wednesday, 13 July 2022 11:10 (20 minutes)*

The industrial idream detector was installed at Unit 3 of Kalinin NPP in spring 2021. Data collection had been going on since last spring and after 4-month break since last november, we has continued data collection this spring, evaluated liquid scintillator stability, background conditions, and would like tell about the first plans to upgrade the detector in the future

### **The speaker is a student or young scientist**

No

### **Section**

1. Neutrino physics and nuclear astrophysics

**Primary author:** KONSTANTINOV, andrei

**Presenter:** KONSTANTINOV, andrei

**Session Classification:** Poster session
